

BAYOCEAN

Product Specification Schedule

Representative pre-launch MetaTrader 5 contract specifications

PRE-LAUNCH FINAL DRAFT - SUBJECT TO FINAL COUNSEL AND PRODUCTION APPROVAL

Entity	Bayocean Limited
Company number	2026-00312
Registered office	Ground Floor, Rodney Court Building, Rodney Bay, Gros Islet, Saint Lucia
Draft date	12 August 2026

Status note. This document is drafted for pre-launch approval and is not effective until formally approved and published by Bayocean. Any unresolved item is stated expressly rather than inferred.

Important: these values were extracted from the current test/server configuration supplied by Bayocean. They must be reconciled against the final production server before public release. Test spread adjustments are excluded from this schedule because Bayocean intends to use production raw/variable pricing.

BTCUSD.SF	-10	-10	Wednesday x3	Test setting; unit/reconfirm

3. Pricing

Spreads are variable. Test group spread adjustments, including previously observed +25-point test markups, are not production pricing and must not be included in public specifications. Final production commission and pricing must be verified after configuration freeze.

4. Source of truth and changes

The live MT5 Product Specification and approved Bayocean schedules are the operational sources for current contract settings. Bayocean should retain a versioned change log for product specifications and update public materials when a material client-facing term changes.

These public sources informed the structure of this draft. A foreign rule cited as a benchmark is not represented as directly applicable to Bayocean unless expressly stated.
